ENTERPRISE VOICE AI | BERLIN, GERMANY

CERTIFICATE OF EXPERIENCE

PRESENTED WITH APPRECIATION TO

Ashir Shaikh

FULL STACK ENGINEER

In recognition of professional excellence and valuable contributions to Voho AI's voice automation platform.

During his time with Voho AI as a Full Stack Engineer, Ashir was a valued contributor to the engineering of our enterprise voice automation and white-label AI call-center platform. Working across the web product, backend services, cloud infrastructure, and real-time conversational AI systems, he built and improved LiveKit-powered voice agents, tool and function calling, knowledge-base retrieval, and SIP-based inbound and outbound workflows.

His technical depth, engineering insight, ownership, and dependable execution consistently translated complex business requirements into reliable, production-ready systems. Based on the quality and impact of his work, I confidently recommend Ashir for opportunities in full-stack product engineering, conversational AI, voice automation, and cloud-integrated systems. His technical versatility and commitment to quality would make him a valuable asset to any forward-looking engineering team.

With appreciation for his contribution and best wishes for continued success.

Asfandiyar (Yar) Malik

Founder & Chief Executive Officer
